## **Remarks**

This lovely Monte Carlo 76 "AURORE" Motor Yacht is a very attractive and interesting model featuring some of the latest details, components and technology used in modern boat building. A Kevlar-infused hull, combined with carbon fibre detailing add lightweight construction techniques whilst fortifying the strength credentials of the boat, and Zeus pods combined with Joystick Control offer superior manoeuvrability and the bonus of frugal consumption at cruising speeds. The specification of this example is excellent and even includes a rear lazarette accessed through the opening stern door. The tender sits on the hydraulic platform and is easily launched and recovered by a single person. With a carbon fibre opening hard top, and a sleek metallic sky-blue hull, the boat looks amazing, and the interior design is very contemporary and spacious. The boat has some innovative and special features and is in immaculate condition. A viewing will prove to any buyer that this is worthy of consideration. Part exchanges will be considered. Please contact us for more information.
